

Front-End Developer for Print design templates (m/w)

Tired of Javascript? This position's area of responsibility focuses on the front-end development of print designs in HTML/LESS-CSS. We are looking for programmers with perfectionistic aspirations, a willingness to learn and good communication skills.

Will can move mountains. The right team is the key ingredient to lead the digital revolution in the hospitality industry. Menutech digitises the creation of menus for restaurants, cafés, hotels and catering companies across Europe. The online service is based on a SaaS model and the interface is implemented as SPA, based on angular (v6), material design, Reactive Programming and Redux State Management. The Menus' output is in a PDF format, templates are programmed in Jinja2 (enhanced HTML / CSS).

Position
"Werkstudent", Internship,
Temporary employment

City
Berlin, Hackescher Markt

Employment type
Part-time, 20 hours/week,
Full-time, 40 hours/week.

Career level
Entry Level, or
3+ years experience

Remote work
Limited, upon arrangement

Starting date
Flexible

Responsibilities

- The development of stunning menu designs based on detailed design specifications.
- Further development and bug fixes on existing designs to achieve greater flexibility for the software's Design Configurator.
- Improve user experience by analysing created menus and empathise with the end user.
- Conducting needs assessments to identify new designs.
- Collaboration with Sales / Customer Care, Graphic Designer and CTO.

Qualifications

- Previous self-built projects in the field of front-end development, participation in open-source projects or integration on relevant platforms (Github, Stack Overflow, etc.).
- The ability to understand complex structures and nesting - and independently develop solutions for graphical or functional requirements.
- A passion for good food, an affinity for gastronomy and user-centric work.
- Working method: Clean & DRY.

Our promise

- An exciting position in our startup team in the heart of Berlin-Mitte.
- Agile work methodology and modern tools.
- Trust and responsibility from D-1 and regular feedback discussions for professional growth.
- Competitive content.
- An open working environment with plenty of room for new ideas.
